www.del.ac.id

July 2015 - June 2018

Senior High School
Science Program
SMAN 17 Medan
www.smanegeri17medan.sch.id

“ I am a person who likes to try new things. I can work under pressure and participate in teamwork to solve problems together. If I start to feel bored, I'll find ways to make that thing look more fun. I also feel happy to share the knowledge and experiences that I have to others ”

Project During Study

2021

Marves Prime - Web Development Project

This project was in collaboration with the Coordinating Ministry for Maritime Affairs and Investment (KEMENKO MARVES). The web was developed to simplify reporting on performance and decision making. The web was implemented using HTML, CSS, JavaScript, and PHP as programming languages and used Laravel and Bootstrap as framework.

2021

E'mart (Buyer) - Mobile Application Project

This project was in collaboration with CV Mandike Instruments. In This project, we developed a mobile application as a marketplace where people can buy some fruits, vegetables and many more. The application was implemented using Dart as programming language and Flutter with GetX as framework.

2021

Booking - Web Development Project

This project was in collaboration with CV Mandike Instruments. In This project, we developed a website that used to introduce a mobile application for booking sports venues. The web was implemented using HTML, CSS, and JavaScript as programming languages and used Bootstrap as framework.

2020

Sistem Informasi Manajemen Tugas Akhir (SIMTA) - Web Development Project

This project was developed to simplify the final project system business processes. The web was implemented using HTML, CSS, JavaScript, and PHP as programming languages and used Laravel and Bootstrap as framework.

2020

Radio Del FM App Redesign - UI/UX Project

This project used Figma Application to redesign the mobile application of Radio Del FM. The redesign stage included finding problems, determining solutions, creating a style guide, redesigning the application, and creating a final report.

2020

ARCT - Technopreneurship Project

This project was a simulation of applying a start-up company named ARCT that provides interior design services, starting from determining the target market, features, revenue until designing the application in the high-fidelity prototypes.

2020

Lemon Fruit Shop App - Java OOP Project

This project implemented a fruit shop information system with a java-based application. The application used the SQLyog database and consisted of marketing, inventory, and employee report management features.
